# WORLD'S WILDEST

An anthology revealing nature's fiercest, funniest, and most bizarre creatures—fighting, surviving, showing off, and thriving.

World's Wildest uncovers the animal kingdom at its most extreme — from ruthless killers and flamboyant show-offs to the ugliest survivors, brainiest problem-solvers, and fiercest fighters. Across six gripping episodes, the series reveals the boldest, strangest, and most unexpected strategies creatures use to thrive in nature's toughest arenas.

With stunning cinematography and surprising stories, World's Wildest proves that in the struggle for survival, there's no single recipe for success — only the wildest will prevail.

6 × 60 mins	UHD	Just delivered!

docu**lights**

## NATURE'S NEAR MISSES

In the wild, animals outsmart predators and disasters using instincts, teamwork and clever survival strategies.

Life in the wild is a constant game of survival, where danger lurks everywhere. Animals rely on speed, instinct, and teamwork to stay alive.

Toads sense earthquakes before they strike, Topi face predators when exhausted from mating battles, meerkats protect each other with watchful eyes and

alarms, and pangolins evade predators by hiding in plain sight under their tough armour. Every day brings near-misses and threats, and survival demands clever strategies, quick thinking, and sometimes, a little luck.

1 × 60 mins	HD	Just delivered!
-------------	----	-----------------

docu**lights**

## EPIC ANIMAL CROSSING

From epic migrations to daily journeys, animals risk everything to survive, adapt and reach safety.

Life in the wild is full of risky crossings. Animals must navigate oceans, rivers, deserts, and daily obstacles to find food, shelter, and mates. Wildebeests undertake epic migrations, while European wetland animals make constant, smaller crossings

Human development increasingly blocks their paths, with millions

of vertebrates killed on roads each year. Wildlife corridors and simple changes, like closing roads at critical times, can help. Survival drives every crossing, shaping behavior and evolution. With foresight and care, humans can help animals safely continue their journeys and thrive in their habitats.

1 × 60 mins	UHD	Just delivered!

docu**lights**

## BABIES – A WILD WELCOME

See how animals bring new life into the world, overcoming danger with instinct, resilience and care.

New life is a miracle—fragile, beautiful, and full of promise. From tiny paws and wide eyes to first feeds, every journey begins with a wild welcome. But bringing new life into the world is rarely simple. Leatherback turtles travel thousands of kilometres to nest, lions work together to protect their cubs, badgers time births perfectly, and catsharks lay eggs

in predator-filled waters. Survival is never guaranteed, yet through instinct, resilience, and devoted parents, some young animals beat the odds and begin life in the wild.

1 × 60 mins	UHD	Just delivered!
-------------	-----	-----------------

docu**lights**

## HOW TO TRAIN YOUR KILLER

In the wild, young predators grow into lethal hunters through practice, guidance and natural instinct.

We are all in awe of the world's predators, but they're not all born that way.

While some show blood lust from birth, most need months or years of training to become deadly hunters. Young predators learn through trial, play, and guidance from parents—perfecting stalking, speed, and technique.

Birds of prey master the skies, lions rely on teamwork, and hunting games build stamina and skill. Instinct, patience, and practice shape these killers, proving that becoming a predator takes dedication, perseverance, and a belief in one's own abilities.

## NATURE'S CALENDAR

Explore Earth's seasons as wildlife adapts, survives, and thrives through nature's breathtaking cycles of change.

Nature's Calendar takes viewers on a breathtaking journey through the year, revealing how wildlife adapts to Earth's rhythms. From spring's renewal and summer's abundance to autumn's challenges and winter's stark beauty, each episode uncovers powerful stories of survival.

Epic migrations, dramatic courtship rituals, and life under extreme weather showcase nature's resilience across every landscape—from polar ice to tropical seas. With stunning visuals and compelling storytelling, this series celebrates life's constant cycles of change and the beauty found in every season.

## COLOURS OF NATURE

Discover how animals use colour to survive, communicate and attract, revealing nature's vibrant language.

Colours define the natural world, from subtle hues to shocking displays, enhancing beauty and signalling meaning. Animals, like humans, rely on colour as a language—for warning, camouflage, or attraction. But colour is only useful if it can be seen, and the better an animal's vision, the more it can exploit the spectrum. Colours

influence behaviour, mating, and interactions. For humans, the animal kingdom's shades create a spectacular kaleidoscope, but for the creatures themselves, these vibrant colours are essential, shaping survival, communication, and life in the wild.

## THE SECRET WORLD OF SNAKES

Uncover the secret lives of snakes—master hunters, ultimate survivors, and misunderstood predators—on a thrilling journey through their diverse habitats, extraordinary adaptations, and complex relationship with humans.

Fast, deadly, and masters of camouflage—snakes are some of the most feared creatures on Earth, responsible for over 100,000 human deaths each year. Yet, these misunderstood predators are victims of our encroachment on their habitats, sparking a complex and often dangerous relationship with humans.

The Secret World of Snakes takes viewers deep into the hidden world of snakes, revealing their astonishing survival strategies. From venomous fangs that inject lethal poisons to suffocating constrictors, these reptiles have perfected their deadly skills. Some hunt by blending seamlessly into their surroundings, while others have adapted to treetops, desert dunes, and even underwater, using tactics that defy belief.

With unparalleled access to over 100 snake species across the globe, The Secret World of Snakes goes to the extreme to uncover their killer strategies and extraordinary abilities. Collaborating with the world's leading scientists and herpetologists, we reveal the breathtaking secret lives of these creatures, showcasing the deadly art of survival in ways never seen before!

# MYSTERIES OF THE RED SEA

OceanX leads a groundbreaking expedition into Earth’s youngest sea, uncovering super corals, alien worlds in the deep, and urgent discoveries that could shape the future of our oceans.

Beneath the desert sun lies one of Earth’s last great frontiers: the Red Sea. Still forming as Africa and Arabia drift apart, it is the youngest sea on the planet — and one of the least explored. Now, in partnership with OceanX, the team behind James Cameron’s Disney+ series OceanXplorers, this premium documentary takes viewers on an extraordinary journey from coral mazes to abyssal depths.

With state-of-the-art submersibles, the expedition reveals “super corals” thriving in extreme heat that may hold the key to saving reefs worldwide, rare animal behaviors like dolphins self-medicating with coral, and alien environments such as brine pools and mineral chimneys where life survives without sunlight. Along the way, scientists uncover a massive submarine landslide fault — a geological scar with the power to trigger future tsunamis. Visually stunning and scientifically groundbreaking, Mysteries of the Red Sea shows how life survives at the very edge, and why this sea holds vital lessons for our planet’s future.

# HISTORY OF LIFE ON EARTH

Journey through Earth's 4.5-billion-year history, witnessing life's evolution from oceans to dinosaurs and modern mammals.

The story of Earth punches far above its weight considering our planet's tiny size compared with our vast universe. It's an epic tale four and half billion years in the making, with drama and surprise at every turn. What's more, in all the vastness of the universe it is unique – for here alone, life began. From the very beginning, the natural world has displayed a spectacular and thrilling diversity of colour, form and behaviour.

In this series we take a journey through the 'History of Life on Earth' starting when the seas were full of life, to when the first land masses emerged and animals took their first steps on dry land. To the rise of the giants when the dinosaurs ruled the land to mammals that followed and took over leading to the stunning diversity of animals we enjoy today and the start of our dramatic story on Earth.

## CUTTING THE LINE

A kayaking tour guide and his family rescue entangled seals along Namibia's Skeleton Coast, evolving into a unique environmental organization tackling a global plastic crisis.

Cutting the Line follows the story of Naude Dreyer, kayaking tour guide based in Walvis Bay, Namibia, who starts rescuing seals entangled in fishing line, packaging straps and other ocean pollution, ultimately saving them from an agonising death.

When his wife, Katja, discovers what he is doing, they start an environmental organisation to raise awareness about the devastating effect of plastic pollution by documenting the rescues and sharing them through social media. The response they get from around the world is overwhelming and the organisation quickly evolves into a full-time operation. Despite this, the Dreyers are acutely aware that they face a daunting challenge, specifically the formidable threat posed by the world's reliance on plastic; the fishing industry; and the magnitude of the global plastic crisis. This is put into stark relief and illustrated by their successes and failures in the field, and the contrasting emotions the rescues bring out between hope and despair.

1 × 60 mins / 1 × 90 mins	HD/4K	IN PRODUCTION
---------------------------	-------	---------------

# VALLEY OF THE BEARS

Bear-human co-habitation challenges is on the rise across the world, with a dramatic increase in bear-human conflicts in the stunning coastal valley of Bella Coola, British Columbia.

The region has one of the highest concentration of bears and humans on the planet and conflict occurs on a daily basis. The hunting of grizzly bears is now prohibited, and bear viewing for and by tourists is growing uncontrollably. The bears are getting habituated and are losing their fear of man. Salmon numbers are the lowest in decades, forcing the bears to find other food sources, getting to town to forage for food, and breaking into people's homes.

In recent years human-bear conflict has become ever more frequent and serious - locals are getting injured and bears are being destroyed. Jerry, a local resident, describes how he fought for his life when attacked by a grizzly. Lawrence, a hunter and father of three, rein-acts the incident where he shot a charging bear in self defense, after already having had his daughter mauled. Ken, a conservation activist, explains how he moved from the city to be closer to the bears. Fraser, a tourist guide, insists that people need to use electric fences to deter bears from their properties. People rarely used to see bears, so what has changed?

With gripping characters, stunning wildlife cinematography and storytelling of the highest calibre, we tell the intimate story, of what it's like to live with an incredible, but unpredictable apex predator. With a feature-doc style inspired by "The Ivory Game", it mixes fast paced action sequences with profound storytelling.

1 x 60 mins	HD	TV3

# CECIL, THE REAL LION KING

The documentary tells the story of Cecil the lion, one of the biggest wild lions in Hwange Game Reserve, Zimbabwe, and his life before being tragically killed by hunters.

In the Western reaches of Zimbabwe, the country's largest national park lies beneath a canopy of Mahogany and Cathedral mopani trees. Once the ancient hunting grounds for the warrior-king Mzilikazi, the Hwange Game Reserve has been a national park for nearly a century.

1 x 60 mins	HD	National Geographic Wild, Curiosity Stream, KBS, SBS Aust., RTP, APT
-------------	----	--

RIVERWOODS

Narrated by Scottish Actor and Director Peter Eter Capaldi (Doctor Who, The Devil’s Hour), Riverwoods explores the complex relationship between Scotland’s Atlantic salmon and its natural woodlands.

Riverwoods tells the story of Scotland’s Atlantic salmon—the King of Fish—whose life is bound not only to rivers, but also to forests, soils, predators, scavengers, and herbivores. Once thriving in vast numbers, salmon are both an angler’s prize and a crucial part of a forest ecosystem. Yet centuries of woodland loss and vanishing

wildlife have transformed Scotland’s rivers, leaving them unable to sustain the great salmon runs of the past. Today, this iconic creature, symbolic of Scotland’s wild rivers, faces grave threats. Riverwoods explores the extraordinary bond between salmon and forest, and the urgent need for renewal.

## HIDDEN SECRETS OF THE ADRIATIC

Explore the Adriatic hidden history, revealing the tales of ancient civilizations and their enduring legacies across millennia.

The Adriatic is a sea that has been sailed upon since the dawn of history. Located in the heart of Europe, its position has made it a highway for many civilizations and the centre of events which have changed the course of human history. In this four part history series we go on a journey of discovery, as we explore the hidden secrets of the Adriatic, uncovering the stories of the people who have called this land home for thousands of years.

Throughout the centuries, kingdoms have risen and fallen on the shores of the Adriatic, but many have been forgotten or erased in history by conquerors. Civilizations have passed through this area, shaping the Adriatic's narrative. Recent archaeological finds are rewriting this story and revealing more diverse and interconnected history.

Follow us as we dive into the past, from the early humans and Neanderthals who once roamed these lands and left traces of the first culture with rock art and music; to the Bronze Age Hillforts and Sewn boats, and the times of the Illyrian Kingdoms. Their shipbuilding techniques and developed culture even shocked the Roman Empire. As we sail the Adriatic we follow the mythological journeys of the legendary Greek heroes, as well as pirates such as the famed Queen Teuta. We discover the real archaeology behind the tales through the story of one island, Vis, and the dramatic events of the two World Wars, as we dive into the deep secrets of how to rule this breath-taking sea, that remains inspiring to this day. Witness our journey as we uncover the "Hidden Secrets of the Adriatic".

ADVENTURE

# UNCHARTED AMAZON WITH ASH DYKES

British explorer Ash Dykes and his team battle the untamed jungles of Suriname in a daring adventure in one of the world's most remote wildernesses.

Nestled on the north coast of South America, Suriname is the world's greenest country. 94% of its land is dense jungle. It has the highest proportion of forest cover in the world. For wildlife, it's a paradise; for humans, it's one of the most inhospitable places on earth. In this remarkable series, Welsh explorer Ash Dykes and a small team are flown into the far reaches of its interior – and left to make their escape.

The aim of the expedition is to shine a light on this remote corner of the world, by traversing its jungle, climbing its highest peaks and kayaking, from source to ocean, the largely un navigated Coppename River: a journey that would be another record-breaking achievement for Ash.

The forest here is a pristine environment that's over 50 million years old, but it's now under threat from both legal and illegal logging. For Ash and his team, though, the threat comes from the environment itself. Bullet ants and deadly snakes are never far away, and jaguars present an unfamiliar danger. Accidents and exhaustion and are constant risks, and with the perils of hunting and foraging for food, this leads to a terrifying yet exhilarating adventure.

 REVERSING CLIMATE DISASTER  
 THE CLIMATE RESTORERS  
 #KIDSONTECH  
 ANIMAL DNA  
 ALL THE ANSWERS

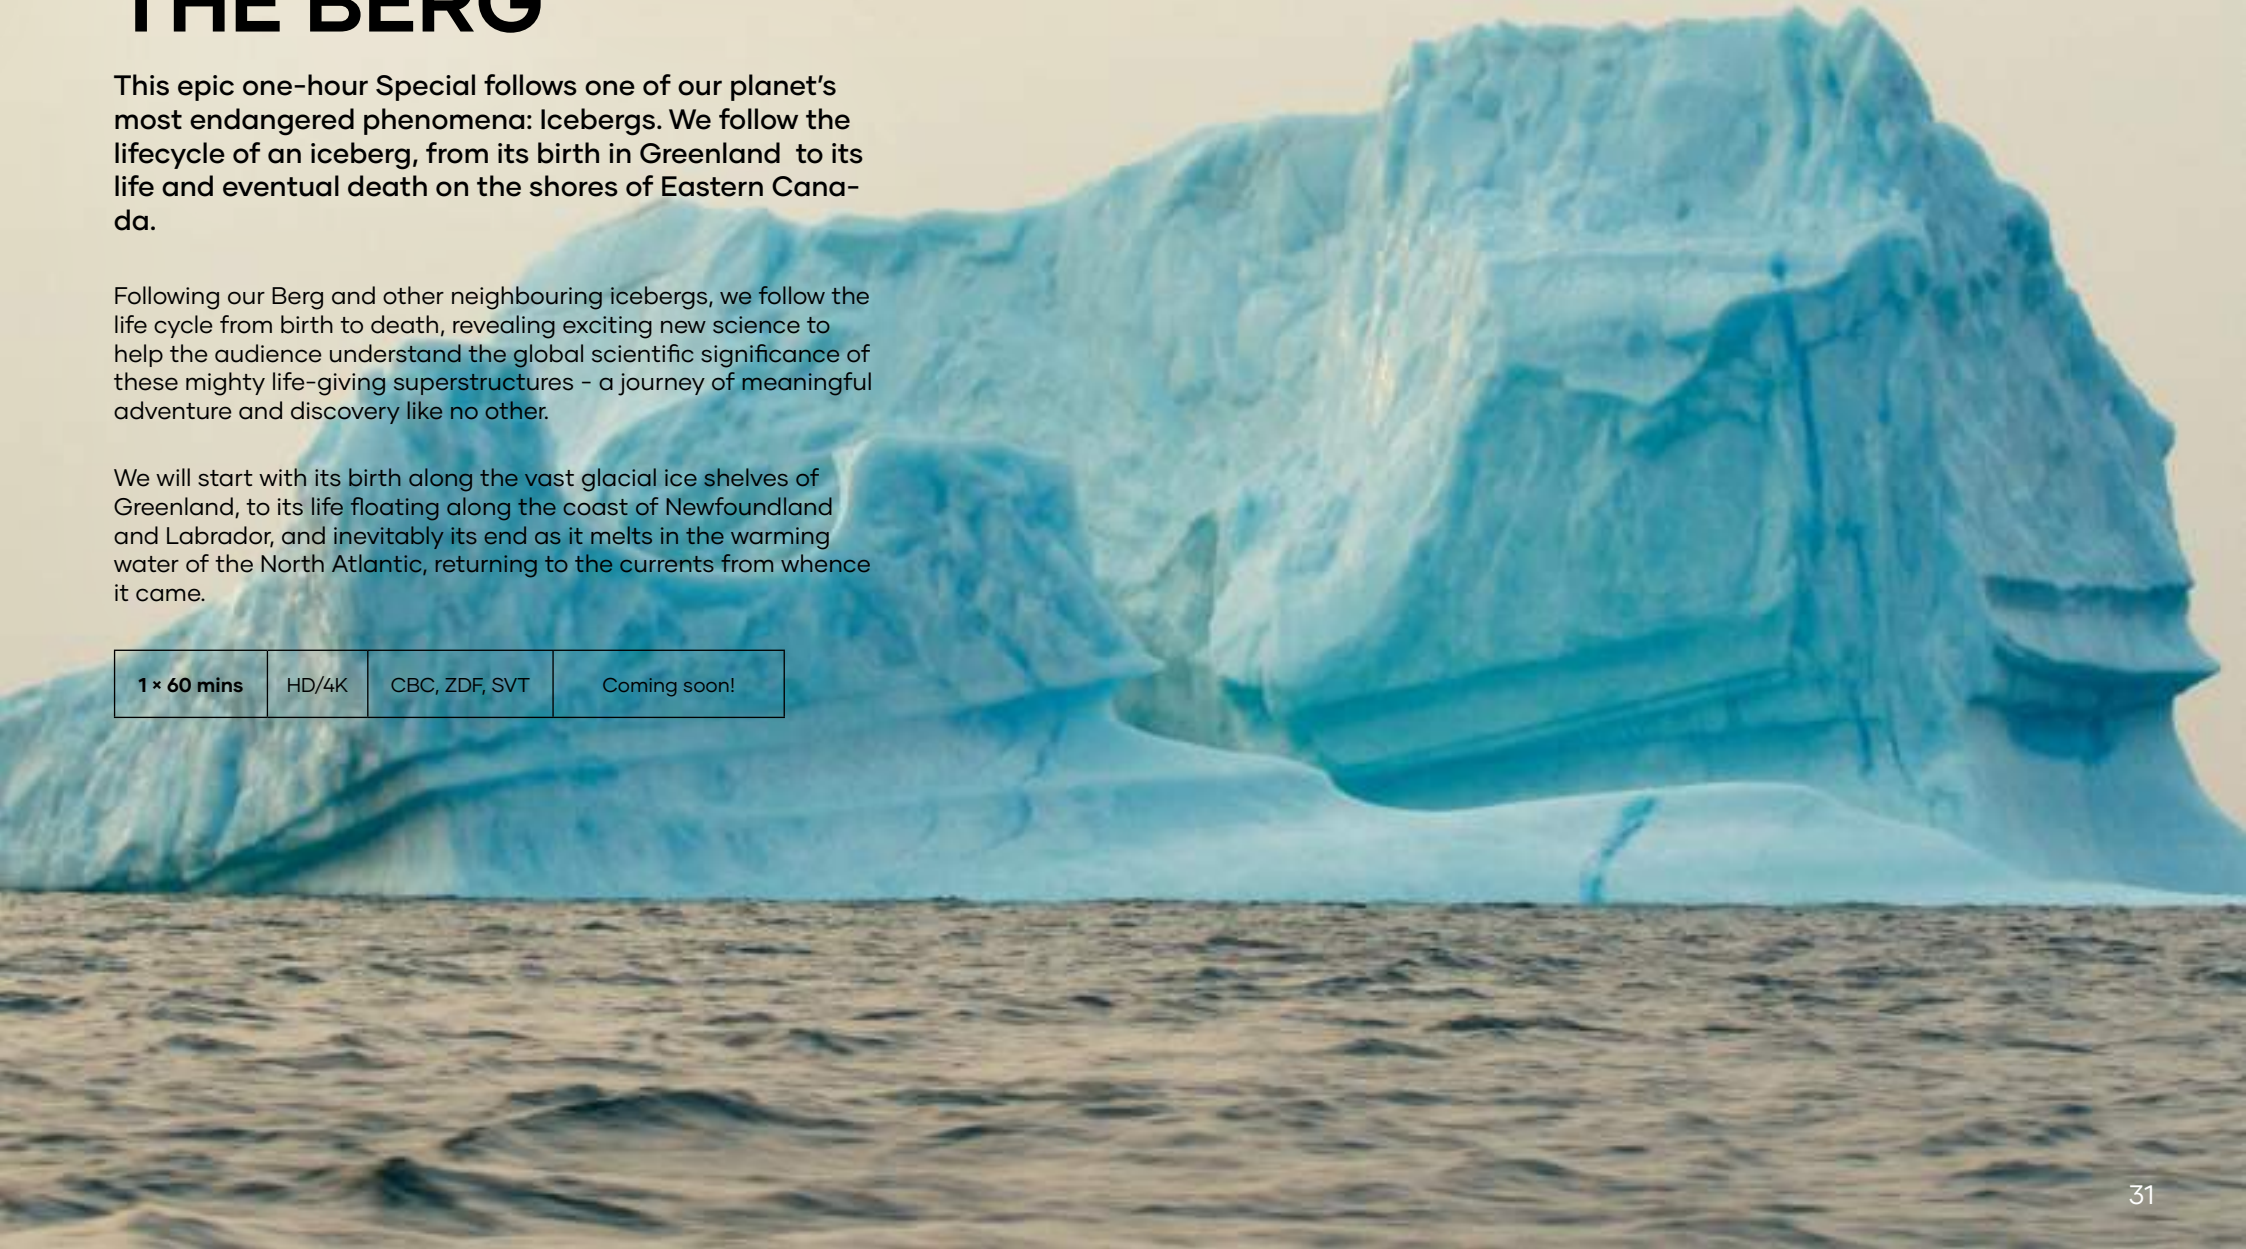

# THE BERG

This epic one-hour Special follows one of our planet's most endangered phenomena: Icebergs. We follow the lifecycle of an iceberg, from its birth in Greenland to its life and eventual death on the shores of Eastern Canada.

Following our Berg and other neighbouring icebergs, we follow the life cycle from birth to death, revealing exciting new science to help the audience understand the global scientific significance of these mighty life-giving superstructures - a journey of meaningful adventure and discovery like no other.

We will start with its birth along the vast glacial ice shelves of Greenland, to its life floating along the coast of Newfoundland and Labrador, and inevitably its end as it melts in the warming water of the North Atlantic, returning to the currents from whence it came.

1 x 60 mins	HD/4K	CBC, ZDF, SVT	Coming soon!
-------------	-------	---------------	--------------

REVERSING THE CLIMATE DISASTER

This film takes us on a global journey exploring revolutionary technologies helping to solve the climate crisis.

Some say a carbon-neutral future is impossible, but Reversing the Climate Disaster shows the innovators proving them wrong. Inspired by Bill Gates’ book and featuring Gates himself, this feature-length documentary explores how we must rethink energy, transport, and cities to tackle rising seas, droughts, and climate challenges.

From CO<sub>2</sub> removal technologies to building the largest sailing vessel in history, we meet creative minds and risk-taking investors driving solutions.

Packed with insight and inspiration, the film reveals how collective ingenuity could make the impossible—saving the planet—possible.

THE CLIMATE RESTORERS

The Climate Restorers is a compelling four-part documentary series that explores how science, technology, and human creativity can help reverse climate change and restore balance to our planet.

This uplifting series explores efforts to restore the climate to a state where all life can thrive. Meeting scientists, engineers, and entrepreneurs, it shares their visions and stories while examining four major nature-based technologies for carbon removal and methane reduction.

The series also explores the social

and economic changes needed to accelerate safe technologies, restore ecosystems, shift mindsets, and stabilize the planet for the future.

Narrated by Emmy-winning actor Peter Coyote, it offers an inspiring look at the solutions shaping a sustainable tomorrow.

-------------	-------	----------

#KIDSONTECH

#KidsOnTech is a film about kids and technology; a film about how the promise of technology is limiting children from developing the very skills they will need to engage in new technologies of the future.

Should we shield our children from it at all costs? Certainly not, nor could we if we tried. It’s increasingly clear the problem isn’t simply technology. However, access and full exposure to it are simply not as benign as perhaps we once thought. Nevertheless, our daily use and encounter with media and technology often reflects unseen values handed to us by tech developers that shape and encourage our behaviors (and our children’s) on multiple levels.

A GAME OF SECRETS  
THE MOLE: UNDERCOVER IN NORTH KOREA  
AMERICAN FOREST FIRES: THE UNTOLD STORY  
THE FUTURE OF OUR PLANET

## A GAME OF SECRETS

A young Portuguese man hacks the global football industry with the anonymous website, "Football Leaks", to expose its most nefarious characters, making himself the target of powerful agents.

An anonymous website called Football Leaks appears out of nowhere in 2015, announcing its mission in a brief manifesto - "This project aims to show the hidden side of football" - and over the next three years, the extremely profitable and highly questionable methods of football's superstars and middlemen uncovered by Football Leaks make global headlines.

To name just a few, Cristiano Ronaldo is convicted for tax fraud and Manchester City banned from the Champions League. Nélito Lucas, a top Portuguese agent in business with Kazakh oligarchs - and one of Football Leaks' main targets - receives an offer from a Russian hacker: Make a generous donation and the leaks of confidential documents and leaks will stop. After a high stakes meeting, police raid a scrappy Budapest apartment. Out walks a teenage-looking Portuguese named Rui Pinto in handcuffs, worn-out sneakers and a backpack full of hard drives.

# THE MOLE: UNDERCOVER IN NORTH KOREA

A real-life undercover thriller about two ordinary men who embark on an outrageously dangerous ten-year mission to penetrate the world’s most secretive and brutal dictatorship: North Korea.

This is the story of “The Mole,” an ordinary family man and a former chef from Denmark turned secret agent, and ‘Mr. James,’ a former jet-set cocaine pusher posing as a Scandinavian billionaire.

When Ulrich Larsen aka The Mole enters the international North Korean Friendship Association (KFA), he quickly jumps the organization’s rank and becomes friendly with KFA’s almighty President Alejandro Cao de Benós. When Cao de Benós tells The Mole that he is looking for possible investors into North Korea. The Mole introduces the mysterious “Mr. James” (played by Jim Latrache-Qvortrup), who pretends to be a possible investor. Cao de Benós gets all excited about Mr. James and the possibility of selling drugs and weapons from North Korea, so he arranges for The Mole and Mr. James to travel to North Korea.

Filmed in secrecy over a period of 10 years, THE MOLE is the most disturbing story of the 21st century and will make you wonder if the world will ever be the same again.

# SPIES: THE SECRET HISTORY OF ESPIONAGE

Discover the untold, thrilling stories of real-life spies, their covert methods, and secret technologies that out-shine the myths of pop culture espionage.

The world of espionage is shrouded in mystery—even to those in it. And so much of what we think we know about spy craft is rooted in literature and film and drama. But even though the true nature of espionage is quite different, that doesn't mean history's real spies are any less heroic. Or fascinating.

In Spies: Secret History of Espionage go behind the shadows with a distinguished panel of historians—including a former intelligence case officer—in search of the secret meeting places, complex codes, stealth observations, and cutting-edge technologies spies have used throughout history.

Using historical visuals and captivating graphics, we cover topics ranging from spies in pop culture, the “femme fatale,” and the most effective secret agents in World War II. As you get to know real spies and their methods, you'll uncover how their work is much more fascinating than anything pop culture could dream up.

## CARAVAGGIO

Mystery, intrigue, beauty, passion, murder – shine a new light on Caravaggio in this dramatic biography.

Five years in production, this is the most extensive film ever made about one of the greatest artists of all time – Caravaggio. Featuring masterpiece after masterpiece and with first-hand testimony from the artist himself on the eve of his mysterious death, this beautiful new film reveals Caravaggio as never before.

Multi-award-winning film makers Phil Grabsky and David Bickerstaff delve into the hidden narratives of Caravaggio's life, piecing together clues embedded within his incredible art. The intriguing self depictions within his works – sometimes disguised, sometimes in plain sight – offer a rare window into his psyche and personal struggles.

Caravaggio's masterpieces are some of art's most instantly recognisable. No one else uses his signature blend of dramatic light, intense naturalism and bold, striking figures. His incredible paintings have captivated audiences for centuries. But there lies a deeper mystery – one that still beckons us to explore. What do these masterpieces reveal about the man behind the brush? Join us as we explore the many clues that help us to finally understand the life – and death – of this remarkable man.

# DAWN OF IMPRESSIONISM: PARIS 1874

This film revisits the extraordinary story of defiance and innovation. It brings the dawn of Impressionism to life through the words of those who were there.

The Impressionists are the most popular group in art history – millions flock every year to marvel at their masterpieces. But, to begin with, they were scorned, penniless outsiders. 1874 was the year that changed everything; the first Impressionists, “hungry for independence”, broke the mould by holding their own exhibition outside official channels. Impressionism was born and the art world was changed forever.

What led to that first groundbreaking show 150 years ago? Who were the maverick personalities that wielded their brushes in such a radical and provocative way? The spectacular Musée d’Orsay exhibition brings fresh eyes to this extraordinary tale of passion and rebellion. The story is told not only by historians and curators, but in the words of those who witnessed the dawn of Impressionism: the artists, press and people of Paris, 1874.

Made in close collaboration with the Musee d’Orsay and National Gallery of Art, Washington D.C.

# FRANS HALS: MASTER OF JOY

This documentary explores how Frans Hals defied 17th-century Dutch norms by painting rare smiles, revealing the cultural significance of laughter in his time and its meaning for us today.

Frans Hals, one of the great Dutch artists of the 17th century alongside Rembrandt and Vermeer, stood apart for his joyful portraits. Unlike his somber contemporaries, Hals filled his canvases with laughter—figures grinning and bursting with life, defying the era’s belief that seriousness defined good art. To his peers, laughter signaled low status, yet Hals painted it with warmth and dignity. Today, as smiling faces dominate social media yet seriousness still signals respect, his work feels strikingly modern.

Featuring insights from writer Arthur Japin, Pulitzer Prize winner Benjamin Moser, art historians, philosopher Philipp Hübl, and artist Glenn Brown, this film explores Hals’ radical celebration of laughter—and what it reveals about joy, class, and humanity.

1 × 60 mins	HD/4K	ARTE

## VAN GOGH: THE REAL STORY

Van Gogh: The Real Story is an immersive journey through the world of Vincent van Gogh, filmed on location at historical sites in Europe and enriched by the voices of fellow Impressionists, as well as the music of his time.

What was the secret of Vincent van Gogh’s amazing output—over 800 paintings, created in less than a decade? How did he arrive at such a deeply individual and expressive style of art? And did he truly mean to kill himself in a field outside the village of Auvers-sur-Oise, or was it merely a desperate cry for help?

Written and directed by Professor Jean-Pierre Isbouts, art historian and award-winning filmmaker, this three-part series—rich with stunning visuals and storytelling—explores the mysteries behind the life and work of one of the world’s most recognized yet misunderstood artists.

3 × 60 mins	HD	SBS, TVP

## VAN GOGH: POETS & LOVERS

This film explores Van Gogh’s transformative years in southern France, revealing his creative process and the passions that fueled his masterpieces.

200 years after its opening and a century after acquiring its first Van Gogh works, the National Gallery is hosting the UK’s biggest ever Van Gogh exhibition. Van Gogh is not only one of the most beloved artists of all time, but perhaps the most misunderstood.

This film is a chance to reexamine

and better understand this iconic artist. Focusing on his unique creative process, this film explores the artist’s years in the south of France, where he revolutionised his style. Van Gogh became consumed with a passion for storytelling in his art, turning the world around him into vibrant, idealised spaces and symbolic characters.

## KRUGER'S WILD KINGDOM

A breathtaking journey through Kruger's rich wildlife, epic history and enduring legacy of conservation and resilience.

The Kruger National Park, spanning nearly 20,000 square kilometers in north-eastern South Africa, is a sanctuary of unparalleled biodiversity. Established in 1926, it hosts 147 mammal species, over 500 birds, and 125 reptiles across 14 eco-zones.

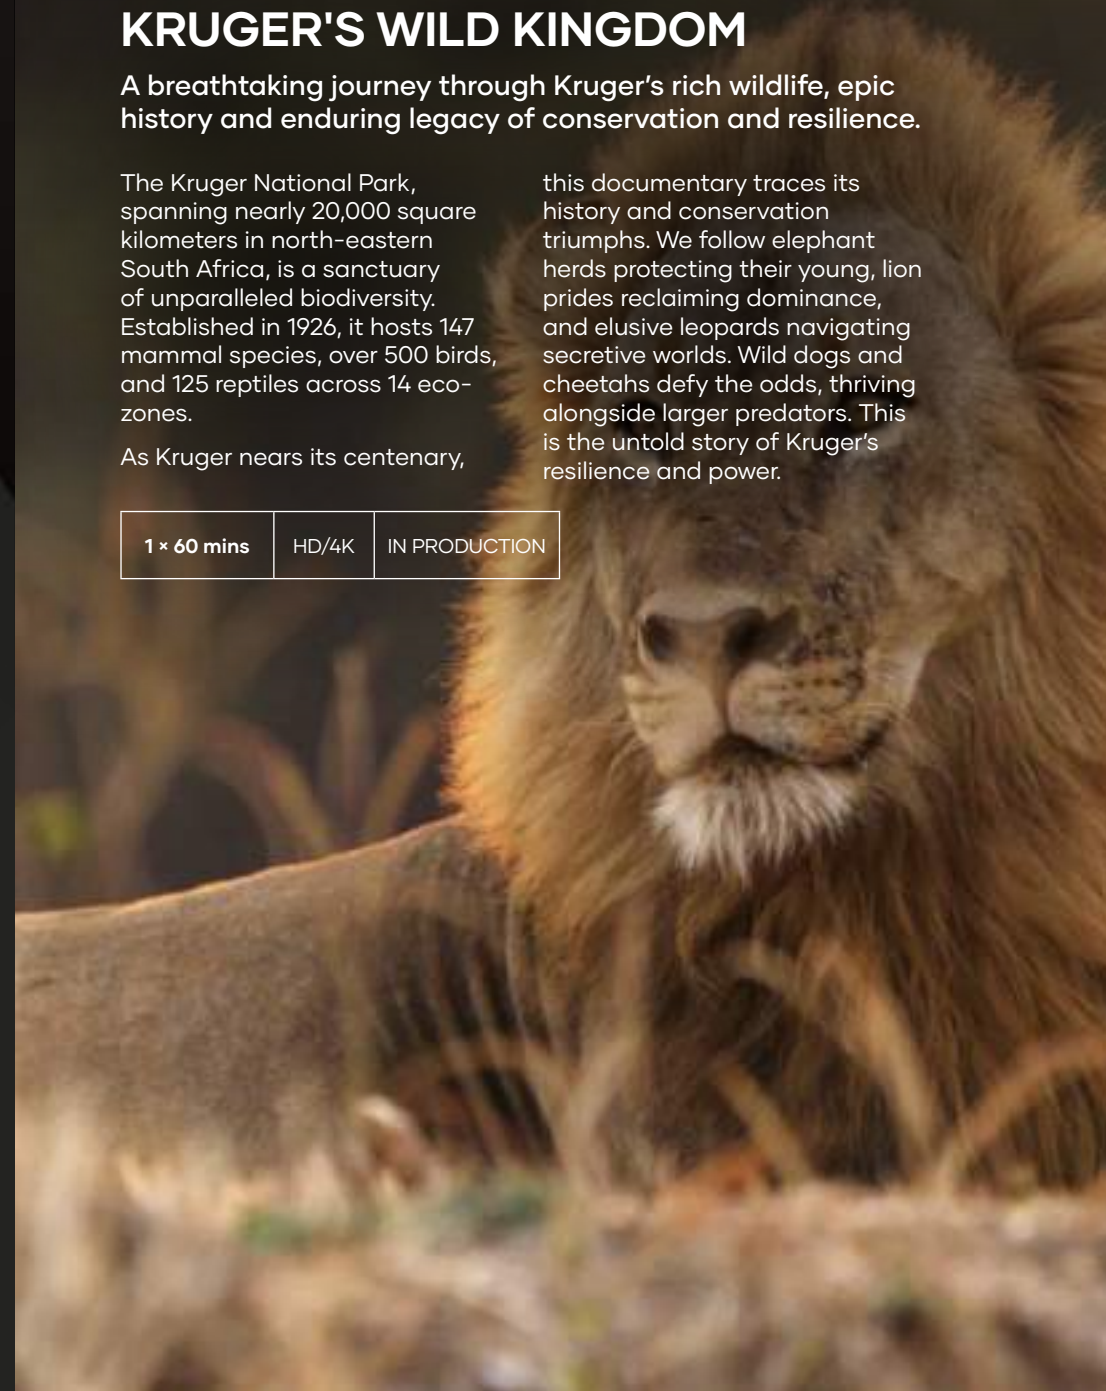

As Kruger nears its centenary,

this documentary traces its history and conservation triumphs. We follow elephant herds protecting their young, lion prides reclaiming dominance, and elusive leopards navigating secretive worlds. Wild dogs and cheetahs defy the odds, thriving alongside larger predators. This is the untold story of Kruger's resilience and power.

## INVASION OF THE SUPERPIGS

Destructive hybrid wild pigs are out of control in Canada. One man is on a mission to stop it.

Canada's landscapes face a crisis as hybrid "superpigs"—intelligent, vicious, and highly reproductive—devastate ecosystems, farmlands, and wildlife, surviving even sub-zero temperatures. Since 2001, their population has surged to an estimated 62,000. With exclusive access to feral pig expert Dr. Ryan Brook, the film follows his

mission into Canada's frozen wilderness using innovative strategies to control these destructive animals. Meeting farmers, wildlife officials, and scientists, the documentary explores the pigs' adaptability, ecological and economic impact, and the global challenge of managing invasive wild pigs in North America and beyond.

## NARA'S WORLD – A POLAR BEAR ADVENTURE

A polar bear cub navigates changing landscapes, learning resilience, adaptation, and survival in a shifting Arctic world.

Nara’s World follows a mother polar bear and her cub from the snow-sealed den to the first light of day.

Across meltwater mazes and flower-strewn meadows, Nara learns that adaptation is life’s greatest lesson. Born on land rather than drifting ice, she navigates thawed puddles,

snow-lined dens, and mossy terrain, discovering how a species shaped by ice can thrive in changing seasons. Amidst uncertainty, Nara adapts, forging ahead to survive, explore, and claim her place in this brave new landscape, in a cub’s-eye portrait of resilience and discovery.

## THE WHITE ROAD

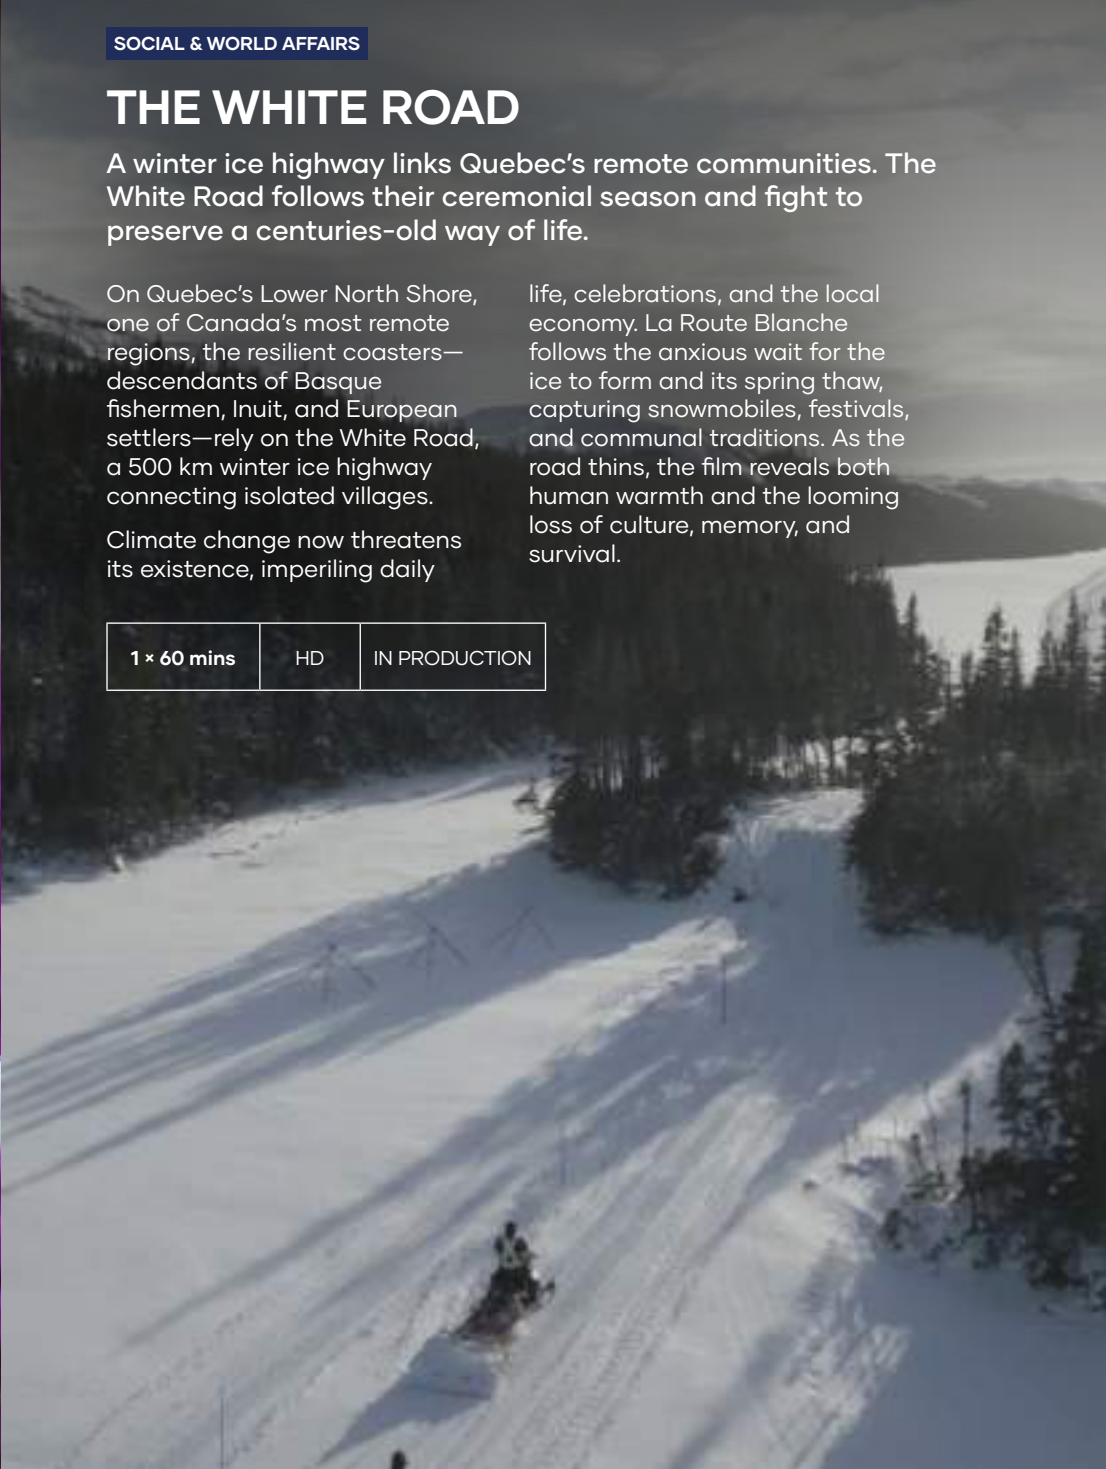

A winter ice highway links Quebec’s remote communities. The White Road follows their ceremonial season and fight to preserve a centuries-old way of life.

On Quebec’s Lower North Shore, one of Canada’s most remote regions, the resilient coasters—descendants of Basque fishermen, Inuit, and European settlers—rely on the White Road, a 500 km winter ice highway connecting isolated villages.

Climate change now threatens its existence, imperiling daily

life, celebrations, and the local economy. La Route Blanche follows the anxious wait for the ice to form and its spring thaw, capturing snowmobiles, festivals, and communal traditions. As the road thins, the film reveals both human warmth and the looming loss of culture, memory, and survival.

## THE SCIENCE OF DECISION MAKING

Discover why we’re very bad at making good decisions and how the latest discoveries in the field of decision science can improve our ability to make better choices and transform our lives.

Every day we make thousands of decisions—up to 35,000, or 2,000 an hour—but most are far from ideal. Humans are surprisingly poor at choosing well, partly because few of us have been taught how. The Science of Decision Making explores the latest research into how we can improve.

Hosted by decision scientist **Anthony Morgan**, the series combines expert insights with street experiments, using unwitting passers-by as guinea pigs to reveal how cutting-edge discoveries can help us make better choices in every aspect of life.

# ARABIA UNTAMED

A bold new series exploring the wonders of nature in the land of legends.

Explore the natural history of the Arabian Peninsula and focus on captivating stories of survival and adaptation in the dry demanding 'Deserts & Mountains' and the teeming yet challenging 'Coastlands & Seas'.

Through extensive research, special access and skilful cinematography these stylish films delve into the unique wildlife that has evolved to survive in the demanding ecosystems of the Arabian Peninsula. Collaborating with local experts in Oman, UAE, Saudi Arabia, Qatar, Bahrain and Kuwait, these visual journeys will entertain and inspire a global audience as well as influence a new generation keen to discover more about the conservation of Arabia's wildlife and natural heritage.

The Arabian Peninsula is way more than desert. It's home to a truly astonishing range of habitats: from rolling dunes to challenging rocky heights and even snow topped mountain ranges. From sandy foreshores, isolated islands and nutrient rich mudflats to lush mangroves, sea grass shallows and teeming coral seas.

By unpacking stories of survival in these inspiring locations, Arabia Untamed will deliver a fresh understanding of the region's wildlife and ecology.

# CHINA'S HIDDEN WILDERNESS

Amid climate change, wildlife and humans across China's diverse habitats adapt, survive, and forge powerful bonds of coexistence and hope.

Global climate change is compelling species and humans alike to adjust to ever-shifting environments. In China, wildlife and people face these challenges together, demonstrating unique strategies of adaptation and coexistence.

Wild Horizons of China, a two-part documentary, dives deep into this theme, exploring four vastly different habitats-river estuaries, snow-capped mountains, bustling metropolises, and volcanic oceanic islands-to tell captivating stories of revival, growth, coexistence, and collaboration.

## KALAHARI – ABOVE & BELOW

Across Africa’s desert heartland, remarkable creatures adapt and endure amid scorching heat, scarce water, and endless struggle.

The Kalahari is a place of extremes — nearly a million square kilometers of desert where water is scarce, heat is relentless, and survival is never certain. Yet life endures. From the open skies to the shifting sands below, every specie has developed strategies to withstand the challenges of this desert. Kalahari: Above and Below reveals these hidden worlds in three episodes, capturing the resilience of creatures that adapt, struggle, and fight to survive in Africa’s desert heartland.

## BLIND NATURE

The film follows Juan Pablo and his wife, the biologist Sara Colmenares, as they explore three extreme habitats – the dense Amazon jungle, the largest tropical wetland of the Pantanal, and the 13,000ft West Andes mountains of maral-lones in Colombia.

Blind Nature is a first-of-its-kind wildlife film.

We will take you into Juan Pablo’s unique perspective, exploring the South American wilderness like never before, through a multi-sensory experience. Specialised camera and sound design techniques will draw our attention to a rich world of sounds,

textures, smells, and sensations that reveal a hidden world beyond what the eye can see.

From the busy leaf-cutter ants to the mystical pink river dolphin, a natural harmony is revealed, subtly juxtaposed against the careless noise of man.

# BENEATH THE ICE: GREENLAND UNCOVERED

A forgotten Cold War ice core reveals Greenland's ice-free past—and a terrifying glimpse into our future.

Hidden beneath Greenland's frozen surface lies a secret that could rewrite our understanding of the planet's past—and its future. When scientists unseal an ice core drilled by the U.S. Army during a top-secret Cold War mission, they uncover ancient twigs and leaves buried 1,370 meters below the ice—evidence that Greenland was once ice-free.

Lead by climate scientist Dr. Dorte Dahl-Jensen, a global team races against time to decode this unprecedented discovery. As they analyze the oldest ice core ever recovered, they uncover clues that challenge today's climate models and reveal that catastrophic melting—and dramatic sea level rise—could happen far sooner than expected.

Combining exclusive access, never-before-seen archival footage, and cutting-edge visuals, *Beneath the Ice – Greenland Uncovered* unravels a mystery 1.2 million years in the making, exposing how the past may determine the survival of our future planet.

## HOW WE GOT

A fast-paced, visually rich, and endlessly surprising factual series exploring the hidden history of the everyday things we take for granted. This isn't linear history—it's a web of unexpected connections that shaped the modern world.

Let's take a wild ride to reveal the twisted truth about How We Got all the stuff that makes the world modern. Batteries, graffiti, the mall, cell phones, electronic dance music, fast food, fast fashion, love, high school, vampires, the bathroom... they are all at the unlikely end of a crazy chain of connections and changes.

Each half hour episode explores a subject revealed through a web of unexpected connections. Under the hood, this is a series that offers an alternative view of Science, Engineering, Ideas, and Machines. It's all about change - a new way of looking at the science, history, creativity, and invention stories we love.

## CRITICAL INFRASTRUCTURE

Critical Infrastructure is a compelling science and technology docuseries that investigates how the essential systems we rely on every day are at risk—and what we can do to safeguard them.

Each episode dives into real-world events—from grid collapses to cyberattacks—drawing on expert analysis from historians, engineers, scientists, and frontline responders. Using stunning CGI simulations and clear, accessible storytelling, the series unpacks how these complex systems function, where their weak points lie, and how

smarter design, better policy, and cutting-edge innovation might prevent the next global domino effect.

This is the story of the infrastructure we can not live without—and what happens when it fails.

EXPLORING SPACE:  
NEW FRONTIERS

Join a transformative journey as humanity explores new frontiers in space, unlocking the mysteries of the cosmos.

Humanity stands at the edge of its greatest adventure. In Exploring Space: New Frontiers, join us as we embark on a journey that will forever change what it means to be human.

The film explores how the rockets that will take us beyond Earth are being built, how we will adapt to living on new worlds, and what

lies in the distant stars waiting for discovery.

With contributions from the world’s leading scientists and visionaries, witness the technology and imagination that will unlock the cosmos. The future of humanity is among the stars, and the journey is just beginning.

WHEN ENGINEERING FAILS

Uncover the devastating truths behind engineering failures, revealing the lessons learned from disasters that reshaped our world.

When Engineering Fails uncovers the world’s most shocking engineering disasters — from the catastrophic collapse during Hurricane Katrina to the devastating Chernobyl explosion and the Challenger tragedy.

Through cutting-edge graphics, expert analysis, and archival footage, the series explores how

bridges, buildings, and machines once hailed as triumphs of innovation crumbled due to human error and design flaws. Each episode reveals the hidden stories behind these failures, their far-reaching consequences, and the crucial lessons learned to make future engineering safer, smarter, and more resilient.
